

Steps to upload your website to the Internet:

1. Go to github.com
2. Click Sign Up
3. Create a username (this username should be all lowercase. It will also be part of your url. For instance, my username is jlangue. My URL ends up being "jlangue.github.io")
4. Put in an email address. I recommend NOT using your school email because I never received the 'email verification'.
5. Create a password.
6. Click 'Create an Account'
7. Choose the unlimited public repositories for free; then click continue
8. Scroll to the bottom and Click SKIP THIS STEP.
9. Click START A PROJECT
10. You'll need to verify your email. Go to your email to verify your account.

Creating your repository and your website:

1. Create Repository
 - a. Your repository name should be: username.github.io
 - i. So if my username is jlangue, my repository must be jlangue.github.io
 - b. Click Public
 - c. Click INITILIZE
 - d. Click Create
2. Upload files
 - a. Click upload files
 - b. Click choose files
 - c. Select all of your files
 - d. Click the green Commit Changes
3. Create your folders
 - a. Click CREATE NEW FILE
 - b. Type your foldername (exactly how you have it on your computer, capitalization matters)
 - c. After your foldername, add a backslash /
 - d. In the next box, type the word 'temp'
 - e. Scroll to the bottom and click COMMIT NEW FILE
 - f. Now that your inside this folder, upload files following step 2
